

March Brown Nymph

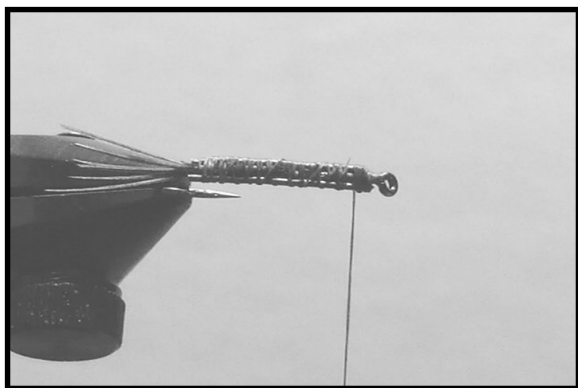

By: Don Privett

Hook:
Thread
Tail:
Rib:
Body:
Wing case:
Thorax:

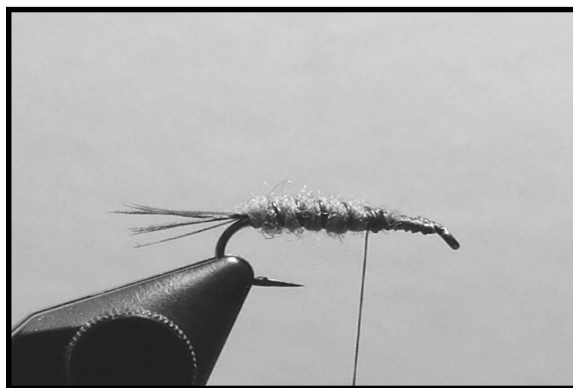

Material lists

TMC 3671 1X long Size 10 – 12
6/0 Brown
Pheasant tail fibers
Brown thread or fine brown wire
March Brown dubbing
Dark Turkey
Same as Body

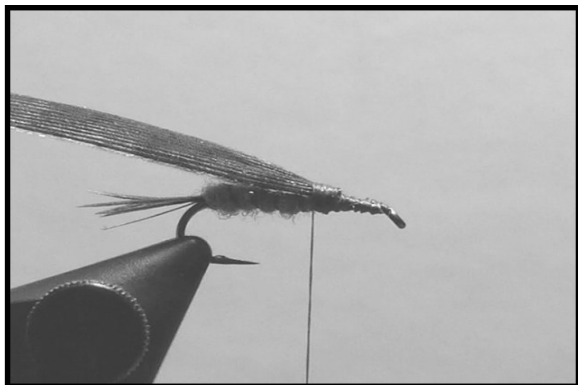

Step 1. Start the thread behind the eye and wrap back the shank of the hook to the bend. There tie in 5 or 6 Pheasant tail fibers.

Step 2. To give the correct flat body shape of this nymph tie in .020 lead wire, one piece on each side of the hook shank.

Step 3. With the thread at the bend of the hook tie in the Brown wire or thread rib and dub the body up to about 1/2 the distance to the hook eye. Wrap the rib forward with wide wraps to give a segmented look. Tie in the Turkey wing shiny side down with the long end pointing back over the tail of the hook.

Step 4. Dub the thorax so that it is a bit bulkier than the body. Then fold the Turkey wing forward over the Thorax to form the wing case. Build a head and whip finish.
